DETAILED ACTION

Withdrawal of Finality

1. The finality of the office action dated 25 November 2003 is hereby withdrawn in order to apply the new ground of rejection stated below.

Claims

2. Claims 1-13 are pending. Claims 14-27 have been cancelled.

Rejections Withdrawn

3. The 35 USC 103 rejection of claims 1, 3-6 and 8-11 as unpatentable over Theodore (US 4,615,851) in view of Zucker et al (US 4,357,436), as set out in section 7 of the 25 November 2003 office action, is withdrawn in view of applicants' arguments in their response dated 20 February 2004, at pages 5 through 7 and 9.
4. The 35 USC 103 rejection of claims 1-4, 7-8, 11-13 and 28-29 as unpatentable over Theodore in view of JP 04119830A and Takeuchi et al (US 5,733,499), as expressed in section 8 of the 25 November 2003 office action, is withdrawn in view of applicants' arguments in their response dated 20 February 2004, at pages 7 through 9.

New Rejection

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claims 1-13 fail(s) to correspond in scope with that which applicant(s) regard as the

invention can be found in the response of 20 February 2004, at page 8, in the last paragraph and in applicants' specification at page 6, in paragraphs 0024 and 0025. In these papers, applicant has stated that the invention uses "a liquid binder system formed using an organic solvent which is a solvent for the glassy segment in the thermoplastic polymeric binder" [quoted from page 8 of the response], and this statement indicates that the invention is different from what is defined in the claim(s) because the independent claims do not recite the use of a liquid binder system formed using an organic solvent which is a solvent for the glassy segment in the thermoplastic polymeric binder. In fact none of the claims recite this type of binder.

It is noted that applicants refer to the binder system discussed immediately above as "unique" at page 8, in the final paragraph, of their 20 February 2004 response.
